Specialized Disclosure Report

Harsco Corporation
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation)

001-03970
(Commission
File Number)

23-1483991
(IRS Employer
Identification No.)

350 Poplar Church Road
Camp Hill, Pennsylvania
(Address of principal executive offices)

17011
(Zip Code)

Russell C. Hochman (717) 763-7064
(Name and telephone number, including area code, of the person to contact in connection with this report.)

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2016.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

In accordance with the disclosure requirements promulgated by the U.S. Securities and Exchange Commission, Harsco Corporation (“we,” “our,” “us,” “Harsco,” or the “Company”) has undertaken efforts to determine the Company’s conflict minerals¹ reporting requirements for the period from January 1 to December 31, 2016.

Conflict Minerals Disclosure

The Company has filed this Specialized Disclosure Report and the associated Conflict Minerals Report, which appears as Exhibit 1.01 hereto and is publicly available on the Company’s website at <http://www.harsco.com/about-us/safety-and-environment.aspx>.

Reasonable Country of Origin Inquiry Information

The Company has conducted a good faith reasonable country of origin inquiry (“RCOI”) to determine whether the necessary conflict minerals originated in the DRC or an adjoining country or came from recycled or scrap sources. The Company’s RCOI process included conducting an inquiry of our direct suppliers using the Conflict-Free Sourcing Initiative’s (“CFSI”) Conflict Minerals Reporting Template (“CMRT”). Based on the results of the RCOI which indicated sourcing from the covered countries, the Company exercised due diligence on the source and chain of custody of the conflict minerals in accordance with the *Organization for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*². The due diligence efforts are discussed further in this Conflict Minerals Report.

Item 1.02 Exhibit

The Company’s Conflict Minerals Report is filed as Exhibit 1.01 hereto.

Section 2 - Exhibits

Item 2.01 Exhibits

The following exhibit is filed as part of this report.

Exhibit 1.01 - Harsco Corporation’s Conflict Minerals Report for the period January 1 to December 31, 2016.

¹ The term “conflict mineral” is defined in Section 1502(e)(4) of the Dodd-Frank Wall Street Reform and Consumer Protection Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo (“DRC”) or an adjoining country.

Senior Vice President, General Counsel, Chief
Compliance Officer & Corporate Secretary

CONFLICT MINERALS REPORT OF
HARSCO CORPORATION
FOR THE REPORTING PERIOD FROM
JANUARY 1 TO DECEMBER 31, 2016

I. Introduction

This is the Conflict Minerals¹ Report of Harsco Corporation (“we,” “our,” “us,” “Harsco,” or the “Company”) prepared for calendar year 2016 in accordance with Rule 13p-1 (“Rule 13p-1”) under the Securities Exchange Act of 1934 (the “Act”). Numerous terms in this Report are defined in Rule 13p-1 of the Act and Form SD and the reader is referred to those sources, and also to Release No. 34-67716 (August 22, 2012) of the Act (the “Adopting Release”) for such definitions.

In accordance with Rule 13p-1, we undertook efforts to determine the content and source of the minerals within our products. The Company designed its efforts in conformity with the internationally recognized due diligence framework put forth in the *Organisation for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*² (“OECD Due Diligence Guidance”) and related Supplements.

The statements below are based on the activities performed to date and in good faith by the Company and are based on the infrastructure and information available at the time of this filing. Factors that could affect the accuracy of these statements include, but are not limited to, incomplete supplier data or available smelter data, errors or omissions by suppliers or smelters, evolving definition and confirmation of smelters, incomplete information from industry or other third-party sources, continuing guidance regarding the U.S. Securities and Exchange Commission (the “SEC”) final rules, and other issues.

II. Overview

Company Profile

The Company is a diversified, multinational provider of industrial services and engineered products serving global industries that are fundamental to worldwide economic growth and infrastructure development. The Company's operations consist of three reportable segments: Harsco Metals & Minerals, Harsco Industrial and Harsco Rail. The Company has locations in approximately 30 countries, including the U.S. The Company was incorporated in 1956.

We are subject to this rule as we have determined that, during 2016, conflict minerals were likely necessary to the functionality or production of products we manufactured or contracted to manufacture. The Company, as a purchaser of component parts, is many steps removed from the mining of conflict minerals. We do not purchase raw ore or unrefined conflict minerals and we conduct no purchasing activities directly in the covered countries.

¹The term “conflict mineral” is defined in Section 1502(e)(4) of the Dodd-Frank Wall Street Reform and Consumer Protection Act as (A) columbite-tantalite, also known as coltan (the metal ore from which tantalum is extracted); cassiterite (the metal ore from which tin is extracted); gold; wolframite (the metal ore from which tungsten is extracted); or their derivatives; or (B) any other mineral or its derivatives determined by the Secretary of State to be financing conflict in the Democratic Republic of the Congo (“DRC”) or an adjoining country.

²OECD (2016), OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas: Third Edition, OECD Publishing, Paris. <http://dx.doi.org/10.1787/9789264252479-en>

Conflict Minerals Policy

The Company developed a policy statement to support the goals expressed by Congress in enacting Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act. The policy highlights the Company's commitment to complying with the reporting and due diligence obligations required by SEC rules and regulations, and the Company's expectations from its suppliers. In addition, the policy includes language encouraging suppliers to source responsibly. The policy resides on our corporate website (<http://www.harsco.com/about-us/safety-and-environment.aspx>).

Reasonable Country of Origin Inquiry Information

We have conducted a good faith reasonable country of origin inquiry ("RCOI") to determine whether the necessary conflict minerals originated in the DRC or an adjoining country or came from recycled or scrap sources.

We began our RCOI by identifying product categories and consumables that may contain conflict minerals. Initial product categories and consumables within this scope included fittings, paint, motors, coatings, air motors, admiralty brass, pipes, welding wire, wire, electrical fittings, lubricants, glass, bushings, electronics, cables, steel parts, fabricated parts, machine parts, castings, hydraulic parts, bearings, power transmissions and tubular parts. Using information derived from Harsco's procurement systems, supplemented by information supplied by personnel in Harsco's divisional supply chain, we produced a list of direct suppliers of components and raw materials that may contain conflict minerals. We then conducted a good faith RCOI to determine whether the necessary conflict minerals originated in the DRC or an adjoining country or came from recycled or scrap sources. Our RCOI process included conducting an inquiry of our direct suppliers using the Conflict-Free Sourcing Initiative's ("CFSI") Conflict Minerals Reporting Template ("CMRT"). We sent reminders to those suppliers that did not respond to our request to complete a CMRT. Based on the results of our RCOI which indicated sourcing from the covered countries, we exercised due diligence on the source and chain of custody of the conflict minerals in accordance with the OECD framework. Our due diligence efforts are discussed further in this Conflict Minerals Report.

Our operations fall into three reportable segments: Harsco Metals & Minerals, Harsco Industrial, and Harsco Rail.

Due Diligence Program Design

The Company designed its conflict minerals program to conform, in all material respects, with the five-step framework of the OECD Due Diligence Guidance, the Supplement on Tin, Tantalum, and Tungsten, and the Supplement on Gold, specifically as they relate to our position in the minerals supply chain as a "downstream" company:

- Step 1: Establish strong company management systems
- Step 2: Identify and assess risks in the supply chain
- Step 3: Design and implement a strategy to respond to identified risks
- Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices
- Step 5: Report annually on supply chain due diligence.

III. Due Diligence Measures Performed by The Company

The following describes the measures taken to reasonably determine the country of origin and to exercise due diligence in the mineral supply chain in conformance with the OECD Due Diligence Guidance.

Step 1: Establish strong company management systems

- a. Conflict minerals team - The Company established a conflict minerals team that includes individuals from the relevant business units and departments, including compliance, finance, procurement, sales, engineering and legal. The team was structured to include the involvement from those in upper management roles to ensure critical information, including the Company's conflict minerals policy reached relevant employees and suppliers.
- b. Conflict minerals policy - The Company adopted and published a policy establishing the expectations of our suppliers. The policy resides on our corporate website.

- c. Internal engagement - We developed a training program for internal use to educate relevant employees on our conflict minerals program and reporting obligations.
- d. Supplier engagement - The Company communicated its conflict minerals policy and provided educational materials to our queried suppliers. Suppliers were provided information on the conflict minerals disclosure requirements as well as recommendations for developing, implementing, and documenting a conflict minerals compliance program.
- e. Company level grievance mechanism - As recommended by the OECD Due Diligence Guidance, the Company has a grievance mechanism in place as a risk-awareness system for conflict minerals issues. The Company has an integrity hotline that is operated by a third-party.
- f. Records management - The Company will maintain records relating to our conflict minerals program in accordance with the recommended record retention guidelines of five years.

Step 2: Identify and assess risks in the supply chain

We performed the following steps as part of our risk assessment process:

- a. Identified products in scope - Our conflict minerals team conducted a detailed review of the products manufactured or contracted to be manufactured during the Reporting Period to identify products that should be deemed in-scope as described by the Adopting Release.
- b. Conducted RCOI - The Company utilized the industry-developed CMRT to query our suppliers for conflict minerals information. We requested this information from the Tier 1 suppliers who provide material and components for the products deemed in-scope by our conflict minerals team. We evaluated the responses from the templates submitted by our suppliers to determine our reporting obligation based on this RCOI. See Appendix I for a list of countries of origin identified through the RCOI process.
- c. Completed additional follow-up - The Company contacted direct suppliers that did not respond to our request for conflict minerals information by the requested date. We also worked to clarify and validate the accuracy of information provided by our suppliers.
- d. Identified smelters or refiners (“SORs”) - The Company compiled a list of SORs in our supply chain using our supplier’s responses in their CMRTs. The Company reconciled this list to the list of smelter facilities designated by the CFSI’s Conflict-Free Smelter Program. We have provided that list in this report.

Step 3: Design and implement a strategy to respond to identified risks

We performed the following steps as part of our risk management plan:

- a. Designed and implemented a plan - The Company used established risk rating criteria to evaluate suppliers based on the responses provided within their CMRT, as well as any additional documentation furnished to support those responses and the suppliers’ due diligence processes. In the coming year, the resulting risk ratings will be used to develop specific supplier outreach and training to address the identified risks and to take corrective actions with suppliers found not in compliance with the Company’s conflict minerals policy.
- b. Verified SORs - As part of the risk mitigation process, the Company reconciled the list of SORs collected from suppliers to the list of smelter facilities identified by the CFSI’s Conflict-Free Smelter Program.

Step 4: Carry out independent third-party audit of smelter/refiner's due diligence practices

The Company is using information provided by independent third party audit programs, including the CFSI, London Bullion Market Association (LBMA) and Responsible Jewelry Council (RJC), to confirm the existence and verify the conflict-free status of SORs identified during our due diligence.

Step 5: Report annually on supply chain due diligence

Accordingly, this Conflict Minerals Report has been filed with the SEC and is available on our website at <http://www.harsco.com/about-us/safety-and-environment.aspx>.

IV. Product Description; Processing Facilities

Product Description - Harsco's operations fall into three reportable segments: Harsco Metals & Minerals, Harsco Industrial and Harsco Rail.

Harsco Metals & Minerals

The Harsco Metals & Minerals Segment is one of the world's largest providers of on-site services for material logistics, product quality improvement and resource recovery from iron, steel and metals manufacturing.

The Minerals business extracts high-value metallic content from stainless steel by-products and also specializes in the development of minerals technologies for commercial applications, including agriculture fertilizers. The Minerals business also produces industrial abrasives and roofing granules from power-plant utility coal slag at a number of locations throughout the U.S. Harsco Minerals' BLACK BEAUTY® abrasives are used for industrial surface preparation, such as rust removal and cleaning of bridges, ship hulls and various structures. Roofing granules are sold to residential roofing shingle manufacturers in the U.S., primarily for the replacement roofing market. This business is one of the largest U.S. producers of slag abrasives and residential roofing granules.

Harsco Industrial

The Harsco Industrial Segment includes the Harsco Industrial Air-X-Changers, Harsco Industrial IKG and Harsco Industrial Patterson-Kelley businesses.

Harsco Industrial Air-X-Changers is a leading supplier of custom-engineered and manufactured air-cooled heat exchangers for the natural gas, natural gas processing and petrochemical industries in the U.S. Harsco Industrial Air-X-Changers' heat exchangers are the primary apparatus used to condition natural gas during recovery, compression and transportation from underground reserves through the major pipeline distribution channels.

Harsco Industrial IKG manufactures a varied line of industrial grating and high-security fencing products at several plants in the U.S. and international plants located in Mexico and China. These products include a full range of metal bar grating configurations, which are used mainly in industrial flooring, as well as safety and security applications in the energy, paper, chemical, refining and processing industries. Harsco Industrial IKG also produces GateGuard™, a fencing solution for first-line physical security.

Harsco Industrial Patterson-Kelley is a leading manufacturer of energy-efficient heat transfer products such as boilers and water heaters for commercial and institutional applications.

Harsco Rail

The Harsco Rail Segment is a global provider of equipment, after-market parts and services for the maintenance, repair and construction of railway track. The Segment's equipment and services support private and government-owned railroads and urban transit systems worldwide.

Processing Facilities - Based on our due diligence process and the information received from our suppliers, the following facilities were identified by the Company's suppliers as the smelters and refiners of the tin, tantalum, tungsten and/or gold present in and necessary to the functionality of products manufactured by the Company in the year ended. The information from our suppliers is still evolving and may contain company level declarations. As such, this smelter list is presented in good faith as the best information we have to date. This list may contain smelters that are not in our supply chain and there may be other smelters not yet identified in our due diligence process. We will continue to update the list as our information and the relevant third-party data from CFSI, LBMA, and RJC improves.

V. Future Due Diligence

We will continue to communicate our expectations and information requirements to our direct suppliers. Over time, we anticipate that the amount of information globally on the traceability and sourcing of these ores will increase and improve our knowledge. We will continue to make inquiries to our direct suppliers and undertake additional risk assessments when potentially relevant changes in facts or circumstances are identified. If we become aware of a supplier whose due diligence needs improvement, we may continue the trade relationship while that supplier improves its compliance program. We expect our suppliers to take similar measures with their suppliers to ensure alignment throughout the supply chain.

In addition to those above, the Company will undertake the following steps during the next compliance period:

- Review the conflict minerals policy Statement and update if necessary.
- Continue to collect responses from suppliers using the most recent revision of the CMRT.
- Engage with suppliers that did not provide a response in 2016 or provided incomplete responses to help with our data collections for 2017.
- Develop specific supplier outreach and training to address the identified risks and to take corrective actions with suppliers found not in compliance with the Company's conflict minerals policy.
- Monitor and track performance of risk mitigation efforts.
- Compare and validate RCOI results to information collected via independent third party audit programs, such as the CFSI.
- Engage with smelters that have not been audited and encourage these smelters to undergo an independent third party audit (e.g., CFSP or equivalent).
- Encourage responsible sourcing from the Covered Countries.

APPENDIX I - Countries of Origin

The information provided in this Appendix is based on the information collected from the Company's suppliers.

Australia	Malaysia
Austria	Mali
Benin	Mexico
Bolivia (Plurinational State of)	Mongolia
Brazil	Myanmar
Burkina Faso	Namibia
Cambodia	Nicaragua
Canada	Nigeria
Chile	Panama
China	Peru
Colombia	Portugal
DRC	Russia
Ecuador	Rwanda
Eritrea	Senegal
Ethiopia	Sierra Leone
France	South Africa
Ghana	Spain
Guatemala	Thailand
Guinea	Togo
Guyana	Uganda
Honduras	United States of America
India	Uzbekistan
Indonesia	Vietnam
Japan	
Laos	
Madagascar
